Professional Summary

Computer Science Engineering graduate with hands-on project and internship experience in SQL, Python, Excel, Tableau, and Power BI. Skilled in data cleaning, exploratory data analysis, business KPI analysis, trend reporting, and dashboard development. Translate structured datasets into clear findings on sales, products, customers, and operational performance.

Technical Skills

SQL: T-SQL, MySQL, SQL Server, SQLite, joins, aggregations, subqueries, CTEs, window functions
Python: Pandas, NumPy, Matplotlib, data cleaning, exploratory analysis
BI & Reporting: Tableau, Power BI, Microsoft Excel, KPI dashboards, data visualization
Analytics: Trend and variance analysis, customer/product analysis, segmentation, business reporting, data validation
Tools: Git, GitHub, SQL Server Management Studio (SSMS), VS Code

Experience

Data Analytics Intern, DecodeLabs Jun 2026 – Jul 2026

- Cleaned and prepared datasets with Python, Pandas, and OpenPyXL by handling missing values, validating data types, and checking duplicates.
- Used exploratory data analysis to examine revenue trends, product performance, payment patterns, order status, outliers, and correlations.
- Queried data with SQLite to analyze order volume, revenue, average order value, product performance, payment methods, referral sources, and monthly trends.
- Built an interactive Tableau dashboard to communicate sales and order insights across products, payment methods, order status, and referral sources.

Projects

Global Startup Analytics | Python, MySQL, Power BI, Tableau GitHub | Tableau

- Analyzed startup funding data to investigate funding concentration and differences across industries, geographies, funding timelines, and company status.
- Developed an analytics workflow and visual reporting to turn global startup ecosystem data into evidence-based insights for investors and founders.

Executive Sales Performance Dashboard | Power BI GitHub

- Built an executive dashboard to track revenue, gross profit, margins, product performance, sales channels, regional results, and monthly trends.
- Organized key performance indicators and interactive views to support comparisons across products, regions, and sales channels.

SQL Exploratory Data Analysis | SQL Server, T-SQL GitHub

- Used SQL to calculate business KPIs, examine sales trends, rank entities, evaluate performance, and measure revenue contribution across customer, product, and sales data.
- Applied joins, CTEs, aggregations, window functions, time-series analysis, and customer/product segmentation.

Sales Performance Dashboard | Tableau GitHub | Tableau

- Analyzed sales, profit, and quantity by product, category, region, and time; identified 20.6% sales growth, 43.7% profit growth, and 26.8% quantity growth through year-over-year KPI analysis.

Education

B.Tech, Computer Science and Engineering 2022 – 2026

Parul Institute of Engineering and Technology, Vadodara, Gujarat

Certifications

- Tata – Data Visualisation: Empowering Business with Effective Insights (Forage, 2026)
- Deloitte Australia Data Analytics Job Simulation (Forage, 2026)
- Data Analytics Essentials (Cisco Networking Academy, 2026)
- Introduction to SQL (Simplilearn, 2026)
